SUMMARY

Results-driven professional with over **five** years of experience in organizational management, business development, and graphic design. Proven ability to lead cross-functional teams, develop AI-driven strategies, and deliver innovative solutions aligned with business goals. Currently serving as **Organization Manager** and **AI Leader & Trainer** at **GraphStudio**, where I spearhead the integration of AI technologies across creative, marketing, and operational workflows. Highly skilled in **C++, Python, Java, advanced mathematics, project management, and team leadership**. Committed to continuous growth and performance excellence in dynamic, high-impact environments.

EXPERIENCE

Organization Manager | Graph Studio Agency —

03/2025 to present – *On-site*

- Skills:** Team Leadership, AI Strategy, Workflow Automation, Creative Team Training, Sales & Deal Closing, Client Relations, Branding Oversight, Market Analysis, Workshop Hosting, Scrum Leadership, Strategic Planning, Decision Making.

Mathematics Expert & AI Trainer | Outlier — 09/2024 to

11/2024 – *Remote. California, US*

- Skills:** Problem solving, Expert level in Maths, GenAI Training, LLM models training.

Frontend Web Developer Internship | ABG Egypt —

07/2024 to 09/2024 – *On-Site. Tanta, Egypt*

- Skills:** AngularJS, ReactJS, React Native, Flutter, Dart.

Business Development Manager | AIESEC in Egypt -

01/2024 to 07/2024 – *On-site. Shebeen El-Kom LC*

- Skills:** Public Speaking, Business Development, Teamwork, Team Building, Project Management, Analytical Skills, Business Analysis, Advertising.

Graphic Designer | Graph Studio Agency — 11/2023 to

07/2024 – *On-site. Tanta, Egypt*

- Skills:** Adobe Photoshop, Advertising, Graphic Design, Logo design, Professional minimal designs, Adobe Illustrator.

EDUCATION

Artificial Intelligence | Menofia University — 2023 to Present (Expected Graduation Year 2027)
Seeking Bachelor's Degree in Machine/Deep Learning

PROJECTS

- [SMS \(Student Management System\)](#)

- A project completed utilizing Python's **GUI tkinter** and **SQLite** for a school project. The project ensured that the **Software Engineering** principles, including **object-oriented programming (OOP)** principles, were adhered to.

- [Professional Personal Portfolio](#)

- Leveraging the principles and skills acquired during the Front-end Web Developing Internship @ **ABG Egypt**, I have independently crafted my personal portfolio. This portfolio encompasses a diverse range of frameworks and showcases a comprehensive collection of my projects over the past few years, including a user-friendly form for requesting services.

- [Food Ordering System](#)

- Developing a Food Ordering System Utilizing **C++** and **OOP** Principles

For a school project in first grade, I designed and implemented a food ordering system using only **C++** and its **object-oriented** principles. The system was designed to be user-friendly and efficient, with a focus on providing a seamless experience from a text-based interface.

The system's primary function was to collect user data, including login and signup information. This data was then stored securely for future reference. The system also incorporated features to ensure the best possible user interface (**UI**) and user experience (**UX**) for the users.

- [Gold Data Prices Analysis \(19/9-2021\)](#)
 - This project demonstrates the application of Python for data science and machine learning, combining **Tkinter GUI** development with **Scikit-learn** and **Matplotlib/Seaborn** for an interactive desktop application. The system loads and preprocesses real-world historical gold price data (**1979–2021**), applying data cleaning, visualization, and feature engineering techniques. It uses a Random Forest Classifier trained via **train-test split** and **k-fold cross-validation**, with results visualized through a dynamically generated GUI.

Designed following modular programming principles, it separates concerns across multiple files for data handling, visualization, model evaluation, and user interface. This project emphasizes machine learning workflow, including performance metrics (**Accuracy, Precision, Recall, F1-score**) and confusion matrix visualization, offering both educational value and real-world relevance.

- Led a team of **7** to a project simulation of an online clothing brand with a success rate of **96%** using Microsoft Projects
- Boosted team productivity by **50%** using agile and scrum methodologies
- Completing high quality designs **85%** faster than other designers
- Enhanced design-to-launch cycle speed by **60%** using AI-assisted creative tools
- Led a Team of 8 to complete dense projects faster by **40%**
- Improved content engagement rates by **3x** through strategic visual direction
- Reduced project delivery time by **30%** through streamlined workflows and task automation
- Managed over **15** cross-functional campaigns simultaneously without deadline delays
- Trained and onboarded **10+** team members on AI tools and productivity systems
- Achieved **85%** client satisfaction across multiple departments and deliverables
- Closed **10+** client deals by leading project pitches and showcasing brand strategy
- Led AI integration across creative teams, cutting repetitive tasks by **70%**

CORE SKILLS

- **Technical Skills:** Data Structures & Algorithms, HTML/CSS/JS, Java/C++/Python | OOP, Flutter/Dart, Firebase, Git/GitHub, Adobe Creative Suite, Figma, IntelliJ IDEA, PyCharm, WebStorm, Clion, VS Code, Operating Systems (Linux/Windows), Computer Networks, Cybersecurity Basics.
- **Soft Skills:** Critical Thinking and Problem Solving, Multitasking, Adaptability, Strong Leadership, Team Motivation, Public Speaking, Sales Skills, Deal Closing, Client Communication.
- **Project Management:** Scrum Master, Agile Methodologies, Team Leading, Project Coordination, Performance Optimization, Rapid Prototyping.
- **Business & Strategy:** Business Development, Branding, Content Strategy, Market Research, Social Media Marketing, Startup Scaling.
- **AI & Data:** Machine Learning Fundamentals, AI Integration, Prompt Engineering, AI Workflow Automation, Data Analysis & Visualization, ChatGPT, Midjourney.
- **Languages:** Arabic (Native), English (Fluent **C2 Level**).
